

Municipal and Construction Divisions – Job Openings

Ranked #3 as a Top Workplace, raSmith is a multi-disciplinary consulting civil and structural engineering and land surveying firm. We work on projects nationwide from our seven locations in Wisconsin, Illinois and California.

At raSmith, our culture is focused on client service, quality and innovation. We strongly believe in work/life balance and employee development. These attributes and our people-oriented environment have led us to receive numerous project and culture awards.

We have several position openings in our Municipal and Construction Services Divisions.

raSmith's construction inspection and construction management expertise extends from deep sewers to local roads, state highways and residential subdivisions. Our resident engineers, construction managers and inspectors bring their breadth of know-how and foresight to every project. We view a project through the owner's eyes and consider details that are critical to a successful outcome. We're more than service providers for a specific project; we're our client's eyes and ears. Importantly, we communicate regularly with the public and other project stakeholders and work with the contractor toward completing the project on time and within budget.

Construction positions include:

Construction Services Project Manager - Municipal – Brookfield

Construction Services Project Manager – WisDOT – Brookfield

The Construction Services Project Manager is responsible for leading the technical aspects of a project through innovative and creative solutions to overcome obstacles and ensure client satisfaction, creating and maintaining project schedules, staying on top of project budgets and directing engineers and technicians involved with the projects.

Municipal Division:

raSmith's Municipal Division serves as the engineer of record for many villages, towns, counties and utilities. On a daily basis, we offer creative solutions to communities as they work to both maintain and improve their transportation system, structures, water and wastewater systems, parks and open spaces, and public safety facilities.

Municipal positions include:

Project Manager – Municipal Civil Engineering – Brookfield or Cedarburg: The Municipal Project Manager will assist with client work in their specific market. The successful candidate will identify, initiate, develop, maintain and manage a portfolio of public works projects and municipal clients.
